Managed Services Portfolio

Technical Solution Services

Consulting services to help with the design, planning, build, migration and deployment of IT projects, based on expert knowledge

Infrastructure-as-a-Service

A virtualised, cloud-based compute and storage platform, designed to suit your application workload and built to deliver secure, resilient performance

Network Services

Secure, fully-redundant connectivity to the internet and direct to leading Cloud Service Providers for a superior user experience

Storage-as-a-Service

Flexible, dedicated storage, located in our data centre facilities, with simple, on-demand provisioning that scales as your business grows

Backup & Archiving Service

Automated, fully managed data backup and recovery services to reduce the impact of IT crashes, human error and natural disasters

Security Services

Robust defence and security controls to protect your IT assets against attacks, even before they happen, for maximum protection

Why TelecityGroup?

In an ever evolving technology landscape, we support you on your IT journey. As your business tackles the challenges of today, preparing for what the future holds, you can rely on us to guide you through important changes, as a trusted advisor who shares your values.

We're proud of our technology, underpinned by expert knowledge, industry accreditations and a unique approach to reducing complexity that's tailored to your needs.

From data centres to secure cloud services, our breadth of services, operational excellence and customer-centricity are backed by our people and the processes supporting them. Offering location convenience, extensive coverage, and a rich heritage, with a track-record of continued innovation, investment and financial stability, you're safe in the knowledge that you can rely on us.

Accelerating your digital journey with Managed Services you can rely on.

TelecityGroup
where content meets connectivity

Outstanding data centres.
Expertise you can trust.
